

Rubber Speed Cushions

Saferoads speed cushions provide a road safety system that engages the driver to reduce speed while at the same time causing minimal driver discomfort. With a unique modular design that offers high levels of flexibility, our rubber speed cushions are the ideal solution for any application.

Saferoads has developed a rubber specification for its speed cushions which we believe is the very best available, ensuring durability and longevity in the product - in addition to reducing speed, accidents and noise wherever they're used.

- ✓ Engages the driver to reduce speed
- ✓ Quick and easy to install
- ✓ Minimal impact to buses and emergency vehicles
- ✓ Minimal driver discomfort
- ✓ Unique modular design
- ✓ Greater flexibility
- ✓ Correct size and profile for every situation
