

# Separation Kerb

Separation kerb is designed to direct or separate traffic, as well as being flexible and low maintenance. A Saferoads road divider is a great choice - manufactured with recycled materials, this separation kerbing offers superior durability wherever it's installed.

Separation Kerb is ideal for efficiently redirecting traffic without needing excessive road width or expensive excavation and traffic control costs. It is also an effective lane divider and when hit, it returns to form and shape without tearing or cracking.

- ✓ Redirects traffic
- ✓ Unique interlink design allows segments to work around curbs
- ✓ Does not take excessive road width
- ✓ No expensive excavation/traffic control costs to apply a remedy treatment
- ✓ Superior durability
- ✓ Manufactured with recycled rubber
- ✓ Contours to the road surface
- ✓ Flexible nature allows a positive grip onto pavement
- ✓ Can be fastened for permanent applications or U Bolted together for temporary applications
- ✓ Ideal for redirecting traffic
- ✓ Easily installed and removed - ready for the next job
- ✓ Separation curb posts can be fitted to provide additional delineation
- ✓ Australian Standards Approved
