

# Roadway Solar V-LED Light

The Roadway Solar V-LED Light is the ideal solar lighting solution for areas without affordable access to power. It has been designed to provide bright light throughout the night, out performing the average on-grid street light. With new and improved technology in solar panels, batteries and LED's, it provides a powerful spread. It has been designed with ease of installation in mind, and does not require deep cycle gel batteries which need to be buried in the ground. This light has the battery storage to run at full capacity for several days, even in the case of inclement weather. It will suit many applications, including remote roads, carparks, mining areas and blackspot locations.

- ✓ 75W Australian approved V-LED
- ✓ 320W solar panel
- ✓ Built-in lithium-ion batteries
- ✓ Heavy duty aluminium frame
- ✓ Smart city ready

## SPECIFICATIONS

Product Code	K20200106
Body	High Pressure Die Cast Aluminium
LED	CREE
Wattage	75W Aldridge V-LED
Finishing	Powder Coated (std. grey)
Power	320W Solar Panel
Rating	IP66 IK06
