

Description

Saferoads' Separation Kerb is designed to delineate, re-direct and separate traffic, without needing excessive road width or expensive excavation and traffic control. Flexible, durable and low maintenance, Separation Kerb is an effective lane divider that rebounds after impact, retaining its shape without tearing or cracking.

Features

- Manufactured with recycled rubber and EPDM rubber for superior durability
- Available in highly visible yellow or black with recessed reflective stickers
- Unique interlink design allows segments to work around curves
- Can be fastened for permanent applications or u-bolted together for temporary applications
- The flexible nature of Separation Kerb allows for a positive grip onto the pavement
- Contours to the road surface
- Does not need excessive road width or expensive excavation
- Separation Kerb posts can be added to provide additional delineation
- Available with road traffic control signage to suit many applications
