

Lockable Bollard

Bollards are designed to deter vehicles from pedestrian dense areas or private property. Whether its outdoor dining, strip shopping, or simply a footpath or bus stop, our steel bollards are a great option to encourage drivers to avoid an area.

Our safety bollards can be manufactured in two metal options, to ensure the best material for your application, and then finished in a colour of your choice. We offer a number of different cap options and post colours to achieve maximum visibility!

- ✓ Galvanized or steel options available
- ✓ Various colours available
- ✓ Several cap options available
- ✓ Australian Standards Approved
