

# SupaSteel Guide Post

The SupaSteel Guide Post offers the sharpest point of any steel guide post making it quick and easy to install and remove, either manually or with power drivers.

As the strongest semi-flexible steel post available the SupaSteel comes with a 5-year warranty, will withstand multiple impacts, and can be re-straightened over 10 times whilst remaining rigid. This means replacement cost savings.

A depth mark hole acts as both the hinge for the pole to bend when impacted, as well as allowing for easy removal in the event of the post being relocated. Plastic safety caps are also available, which clip onto the top of the post.

Manufactured from premium steel, galvanised, pre-treated and then powder coated to comply with all Australian Guide Post specifications.

- ✓ Super strong!
- ✓ Can be re-straightened over 10 times whilst remaining rigid. This means avoiding substantial replacement costs
- ✓ Reflective Class 1A Delineator. 50 x 200mm rectangle
